

Jennifer Los Named Director of Human Resources to Drive Workforce Excellence at Leach International

July 2025

Leach International Corporation has appointed Jennifer Los as its new Director of Human Resources. She brings extensive experience in HR leadership across aerospace, technology, and operations-focused industries.

Jennifer holds a Bachelor of Science in Business Administration from California State University, Los Angeles, and maintains her Professional in Human Resources (PHR) certification. Her appointment reflects Leach International's commitment to strengthening its human capital capabilities as we continue expanding our aerospace component manufacturing and distribution operations. *"I'm proud to join Leach International as the Director of HR at a time when we're focused on strengthening operations to ensure consistent quality and availability of our components,"* she says.

Jennifer previously served as Site Human Resources Leader at Parker Hannifin's Aerospace Group, providing business support to Parker's Fluid Systems Division from 2022 to 2025. There, she led a team of HR professionals, conducted leadership development programs, and led HR data analytics and succession planning initiatives.

Earlier in her career, she held HR leadership roles including HR Manager at REEF Technology and HR Business Partner at The Coca-Cola Company's West Region. Jennifer also brings valuable operational and financial expertise from her tenure as Business Operations Manager at Comcast Cable Corporation, where she led financial planning and analysis for the technical operations department and developed performance metrics systems for field technicians.

Jennifer explains that her priority is to *"build a resilient, customer-focused workforce by developing strong leaders, investing in our talent pipeline, and fostering a culture of accountability and continuous improvement."*

About Leach International

A leader in electrical power distribution since 1919, Leach International sets the standard for the design and manufacture of electrical relays, contactors, power distribution assemblies, electrical switches, relays, and control devices. With industry-leading customers in aviation, space, military, and railway systems, Leach has established a reputation as power distribution experts who create quality products built for longevity and mission-critical performance.
