

Justin Coates Joins Leach International as VP of Sales & Marketing to Expand Market Reach

April 2025

Leach International Corporation has appointed Justin Coates as Vice President of Sales & Marketing. A lifelong Southern California resident, Justin brings extensive technical expertise and cross-industry business development experience to strengthen Leach's position in aerospace component solutions.

"I am eager to contribute to Leach's ongoing growth by enhancing customer relationships, introducing innovative technologies, and tapping into underserved markets, all while upholding our reputation for best-in-class service," he says.

Justin began his career at NTS (now Element Labs) in aerospace testing and certification. Five years ago, he moved to PneuDraulics, a hydraulics business in Southern California, where he refined his industrial solutions expertise. His background includes robust business management and sales leadership as Business Unit Manager, where he oversaw strategic planning, P&L accountability, and process optimization. At Leach, he now brings his engineering background and electronics proficiency to drive sales innovation across diverse markets.

Justin holds a Master of Science in Mechanical Engineering from California State University, Fullerton, and a Bachelor of Science in Aerospace Engineering from UC San Diego – providing the technical foundation for his customer-focused growth strategies at Leach International.

"I am thrilled to join the Leach International team and collaborate with such an exceptional group of aerospace professionals. Their remarkable performance in delivering top-notch quality and timely service, especially in the wake of the pandemic, is truly commendable," he says.

About Leach International

A leader in electrical power distribution since 1919, Leach International sets the standard for the design and manufacture of electrical relays, contactors, power distribution assemblies, electrical switches, relays, and control devices. With industry-leading customers in aviation, space, military, and railway systems, Leach has established a reputation as power distribution experts who create quality products built for longevity and mission-critical performance.
